Applicable LEED credit information for the TorZo sustainable surface product line

LEED Category	Description	Possible Credits	Tiikeri™
Environmental Quality (EQ 4.4)	Low or reduced VOCs in commercial interiors.	EQ 4.4 (1-pt)	No added urea formaldehyde
Materials and Resources (MR 4.1)	Recycled content - products that have any recycled content greater than 5% of total value in project contribute to achieving points.	MR 4.1 (1-pt)	Tiikeri is made from >70% post industrial recycled Sorghum straw and >30% acrylic resin.
Materials and Resources (MR 4.2)	Recycled content - products that have any recycled content greater than 10% of total value in project contribute to achieving points.	MR 4.2 (1-pt)	Tiikeri is made from >70% post industrial recycled Sorghum straw and >30% acrylic resin.
Materials and Resources (MR 5.1)	Local/regional products, making up more than 20% of projects building materials, and that are manufactured within 500 miles of project.	MR 5.1 (1-pt)	Applies to projects based in the Northwest that are within 500 miles of "infused" products manufacturing facility in Oregon.
Materials and Resources (MR 5.2)	Of the local/regional products, use a minimum of 50% building materials extracted and manufactured within 500 miles of project.	MR 5.2 (1-pt)	Applies to projects based in the Northwest that are within 500 miles of "infused" products manufacturing facility in Oregon
Materials and Resources (MR 6)	Rapidly renewable resources defined by materials that come from plants or harvested crops within a 10 year cycle.	MR 6 (1-pt)	Tiikeri is made from rapidly renewable raw material. Sorghum straw is grown and harvested yearly.
Materials and Resources (MR 7)	FSC certified products.	MR 7 (1-pt)
